1 Introduction

To say I have a lot of interests would be a gross understatement. I have loved economics since high school, and that love hasn't diminished. Having learned what I have through economics, I know that I will always be involved with the field. I am interested in data science because of the uses it can have for finding solutions to complex problems. I wanted to take this class because of how much I enjoyed econometrics. I have not done any data analysis on food insecurity, so I hope to have my final project center around that. I hope to gain a deeper understanding of data analysis and processes through this class. After I graduate from OU, I plan on going to law school to become a public health lawyer.

2 Equation

$$a^2 + b^2 = c^2$$
